

ArunKumar Surla

Front-End Software Engineer, I build things for the Web.

Summary

Over 4 years of experience in front-end development, focused on building dynamic and responsive user interfaces. Specialized in HTML,CSS,JavaScript and React.

Solid foundation in modern web technologies and development best practices. Proficient in translating UI/UX designs into clean, high-quality code.

Experienced in collaborating with cross-functional teams to deliver robust, user-friendly products.

Strong communication skills and a proactive approach to teamwork.

Passionate about staying current with the latest front-end trends and technologies.

Relevant Experience

Phenom, Hyderabad— Software Engineer

Phenom People is a global HR technology company that offers a Talent Experience Management (TXM) platform powered by AI.

Sep 2023 – Present

- Worked on various modules including Career Sites, Employee Experience, Recruiter Experience, and Analytics Dashboard, ensuring smooth and intuitive user interactions.
- Designed and developed user interfaces using modern frontend technologies to improve candidate engagement, recruiter productivity, and overall platform usability.
- Developed and optimized UI components to enhance performance, responsiveness, and accessibility across different devices and browsers.
- Integrated APIs and backend services for real-time data synchronization, improving recruiter dashboards and job recommendation algorithms.
- Collaborated with UX/UI designers and backend teams to implement feature-rich, scalable, and visually appealing applications, following Figma designs for UI revamps.
- Handled production bug fixes and system optimizations, ensuring a seamless experience for enterprise clients.
- Contributed to software maintenance and feature updates, ensuring stability and scalability in Phenom's talent experience platform.

Intellect Design Arena Ltd, Delhi— Project Engineer

Project: Government e-Marketplace(GeM)

Sep 2021- Sep 2023

- Worked in Government E-Commerce platform also known as GeM where common user goods and services can be procured by government buyers.
- Worked on various modules like Admin Panel, GeM Portal, LMS Modules and Integrations & worked on Production JIRA's and helped the user for a smooth user experience. Developed and deployed few functionality enhancements on UAT.
- Developed and Designed UI by using frontend technologies for the GeM portal and Admin panel modules & Worked on UI Bug fixing and improved the system performance and revamping of the UI of the Seller Side which is given me in Figma structure.
- Responsible for software maintenance across the codebase. Required wide understanding of the internals of the software and systems.
- Developed, maintained, and shipped production code for client websites primarily using HTML, CSS, Sass, JavaScript.
- Performed quality assurance tests on various sites to ensure cross browser compatibility and mobile responsiveness.
